

Welding

Proper gloves are the first line of defense against the hand hazards of welding and cutting. They require protective flame-resistant gloves that provide excellent heat resistance. WLI's gloves protect from cuts, flames, heat and sparks and we have the solution for you.

Available in S-XXL
Sold by the pair or the each

Applications: MIG or TIG Welding, Steel Mills, Metal Handling, Manufacturing, General Maintenance

Y2022

A2 Cut Resistant Goatskin Welding Glove

- Full goatskin leather provides increased flexibility and durability
- Kevlar® lining provides cut and heat protection
- Heat Level 1 on the Cuff area
- Split leather gauntlet cuff provides wrist and forearm protection
- Keystone thumb delivers a comfortable fit along with additional dexterity

Available in XS-XXL

Applications: Oil & Gas, Steel Mills, Manufacturing, Construction, Metal Fabrication, Welding

Y3034

Cut Resistant Heat Glove

- Top-grain cowhide palm for comfort and dexterity
- Cowhide split back adds heat resistance
- A3 cut level protect hands from cut injuries
- Dupont™ Kevlar® lined adds heat protection up to 300°F without the bulk
- Thumb reinforcement for extra long wear

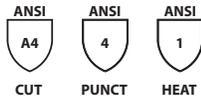

Available in S-XXL
Sold by the pair

Applications: MIG or TIG Welding, Steel Foundries, Metal Handling, Manufacturing, General Maintenance

Y2024

A4 Cut Resistant Goatskin Welding Glove

- Full goatskin leather provides increased flexibility and durability
- Para-Aramid Lining in palm, back of hand, and fingers provides superior cut and heat protection
- Gauntlet cuff provides wrist and forearm protection
- Keystone thumb delivers a comfortable fit along with additional dexterity

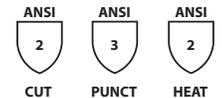

Available in S-XXL

Applications: Construction, Steel & Metal

Y1903

Premium Select Split Cowhide Welder

- Select side split premium cowhide leather
- Sewn with DuPont Kevlar® thread for extreme strength and durability
- Gunn cut, reinforced thumb
- Fully welted, adding durability and greatly reducing the risk of burning through the seams

Available in S-XXL

Applications: Oil & Gas, Steel Mills, Manufacturing, Construction, Metal Fabrication, Welding

Y3032

Premium Leather MIG Welding Glove

- Top-Grain goatskin palm for comfort and dexterity
- Cowhide split back adds resistance to sparks and heat
- Fleece lined adds heat protection up to 350°F without the bulk
- Thumb reinforcement for extra long wear

Available in S-XL

Applications: Construction, Steel & Metal, Rail

Y2021

Mig/Tig Grain Cowhide

- Quality grain cowhide with contrasting split leather 4" cuff
- Sewn with DuPont™ Kevlar® thread for increasing resistance from high heat temperatures
- Cowhide has natural heat and abrasion resistance and good tensile strength
- Gunn cut
- Wing thumb
